

South Lanarkshire College, East Kilbride
'Building on Success'
Appointment of Board of Management Members

South Lanarkshire College, East Kilbride, provides vocational training for more than 6,000 students, employs 315 staff and has an annual turnover of £12.5 million.

When HMIE reviewed the College, they found no main points for action and highlighted examples of sector leading or excellent practice. No other college has received such an outstanding report.

The College relocated to its £34 million state-of-the-art new building in February 2008 which was delivered both on time and under budget. The College secured 2/3 of capital funding itself with the residual provided by the SFC.

The Board of Management provides strategic direction and corporate governance to the College. The College wishes to appoint a number of new members to the Board who are passionate about vocational education, who can contribute effectively, communicate well and evaluate information critically at a strategic level. To complement the existing expertise on the Board, the College would particularly welcome applications from those actively involved at a senior level in human resources, accountancy, care or business.

The appointment is for four years in the first instance, with the possibility of a second term of office. Whilst no remuneration is received for the appointment, all essential costs of travel and other direct expenses will be reimbursed.

Board of Management meetings take place six times a year and are supported by a range of sub committees. Most meetings take place at the College in the early evening.

Members are encouraged to participate in appropriate development activity, sufficient to enhance the collective effectiveness of the governing body to ensure that the College makes a significant contribution to the Scottish economy.

Appointment is by way of interview.
